

Pre-K Counts

The Mifflin County Pre-K Collaborative will offer pre-school services to a limited number of qualified children ages 3-5-- thanks to a grant made possible through the state of Pa and Early Childhood Educators of Pennsylvania. Early childhood education can be a vital stepping stone in helping children establish a firm foundation for their learning years. An approved preschool curriculum and loving teachers will provide learning environments and tools that will provide children the opportunity to learn, explore and grow educationally and socially.

Our goal is to partner with families to help prepare their children for their school years experience. This will be done by providing quality preschool classrooms for qualified families. Half day and full day programs are available for children ages 3-5 at the following sites. For more details or to find out how you can apply please contact one of the following agencies.

Pre-K Counts Services will be offered to children with identified needs at the following sites this fall.
